Can anyone help. I need the rld.dll file for my pc. Please help. A: FIFA 13 uses the game's own Dynamic Link Library (rld.dll) to communicate with the game and access all the features. Unfortunately, the game does not package this file with the installation. After installation, the game needs to be able to locate the file at C:\Users\\Documents\Electronic Arts\FIFA 13\rld.dll in order to continue to operate correctly. This file is contained in the installation package of the game. In order to play a saved game, you need to install the game first before you will be able to load the saved game. A: I have solved my problem... The dynamic library "rld.dll" failed to initialize (E1103) ... But it's very strange error... My game Sims 4 just had some problem and left several popups (Error, STOPPED, Crash etc). After I killed them, the game is working fine and I can use all the games features. I do not know what's the problem (There's no log of error, no crash report...), but that's not very important, I just can't wait to play Sims 4 again. Q: How to change many inputs based on a variable in jQuery? I'm trying to learn jQuery, and I'd like to automate some "onclick" event, what I did was: `$("#input[name='value']").on('click',function() { var thisvalue = $(this).attr('value'); $(this).css('background-color','#ccc'); $("#input[name='value'][value!='" + thisvalue + "']").css('background-color','#fff'); });` Basically, I'd like to change background-color to another color for all the inputs whose value equals to 2d92ce491b
